100% Natural rubber latex

Belbal's latex balloons are made of 100% natural fully biodegradable rubber latex. Laboratory tests have shown balloons to biodegrade to approximately 90% within 2 years. Therefore, latex balloons as a product group can be classed as biodegradable. Latex balloons biodegrade at about the same rate as other natural material, such as oak leaves and wood fibres. Different balloons will have varying rates of biodegradability though, dependent on the process and the desired qualities of the product. Balloons are manufactured using only natural materials, all of which can be found in their natural state in the environment.

Technically speaking, latex balloons are "natural elastomers" (as opposed to synthetic plastic) and will fully disintegrate. However, like a banana peel, once it is used a balloon is litter. Therefore, it should be disposed of properly in a bin.

EBPC - European Balloon & Party Council

We at Belbal, as a balloon producer and member of the EBPC (European Balloon & Party Council), follow the EBPC Code of best practice and its mission statement to educate and promote the fun use of balloons and party products safely, ethically and in respect of the environment.

We do not support balloon releases in a bid to protect the environment from unnecessary litter.
